EXPORT
INVESTMENT

AWEX, partner of the international economic development of Wallonia.

The Wallonia Export-Investment Agency (AWEX) is in charge of the development and management of Wallonia's international economic relations.

With regards to foreign trade, the Agency has a promotion and information mission with regard to both the international and Walloon business community.

Intended for purchasers, decision-makers, importers and foreign prospects, the Agency can, on request:

- pass on economic data regarding Wallonia and its export potential;
- provide information on the products and services of Walloon businesses;
- seek Walloon businesses for the conclusion of international partnerships;
- distribute lists of Walloon exporters.

Vis-a-vis Walloon businesses, the Agency is their comprehensive international partner, providing a range of services and activities covering the entire export process:

- General and commercial information on foreign markets;
- Production of individual market studies on request;
- Organisation of commercial canvassing operations (participation in international shows, organisation of economic missions, sector-based contact days, etc.);
- Contacts with international organisations;
- Promotion of Wallonia and its export potential;
- Financial support and funding for exports;
- Training and raising awareness of international professions.

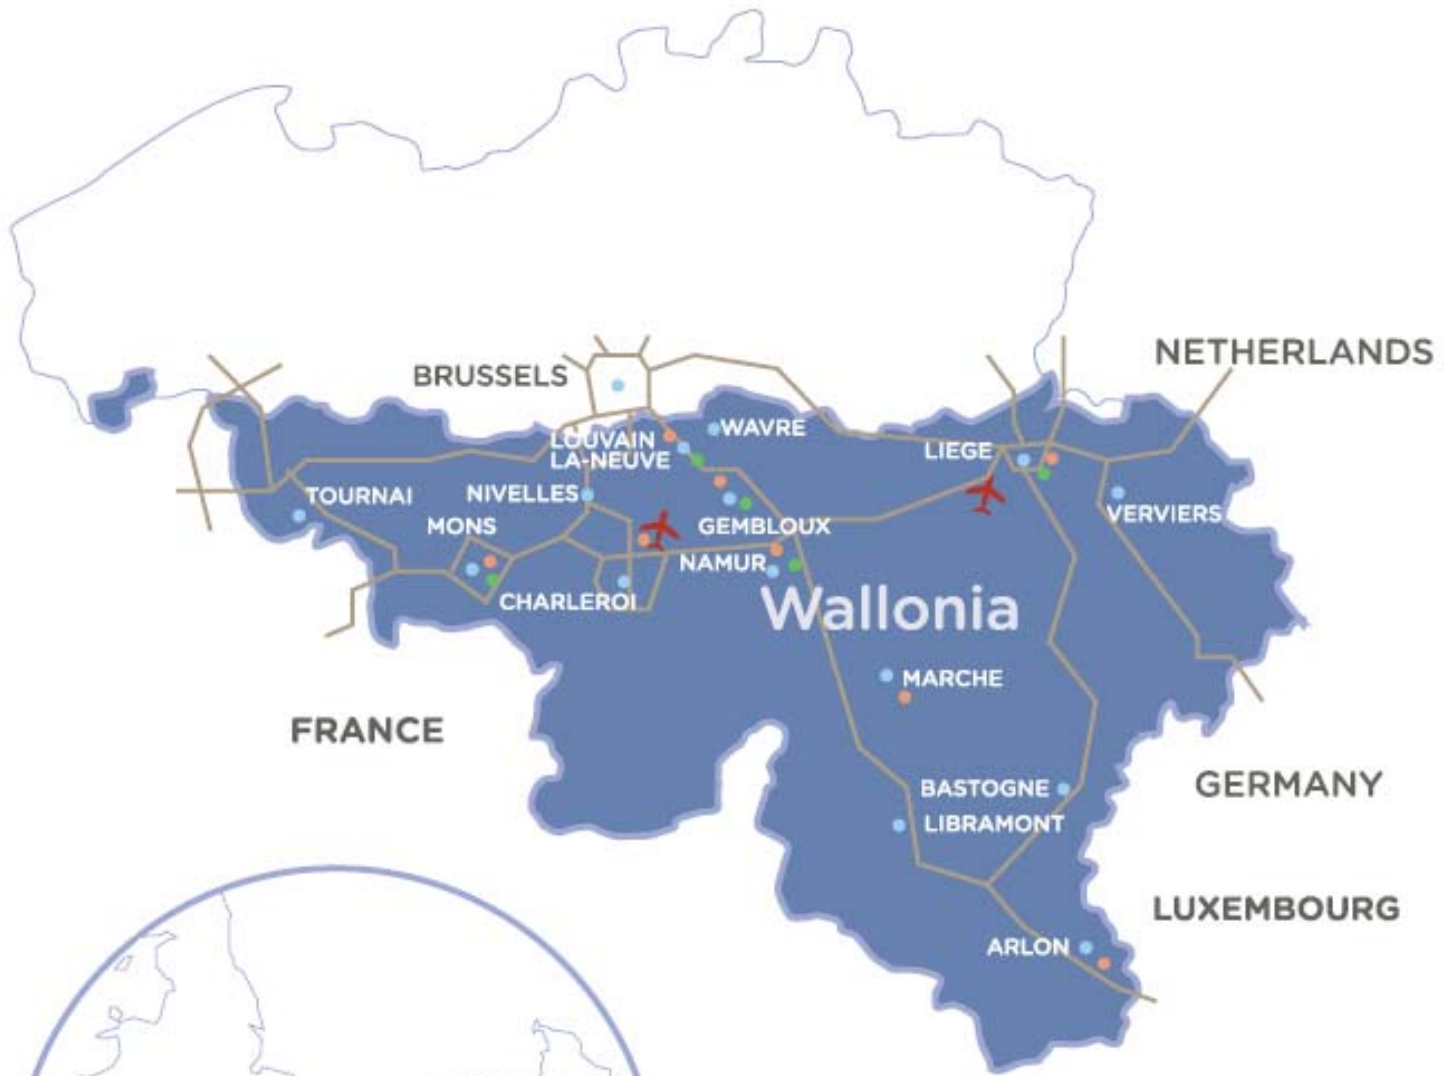

With regards to foreign investment, the Agency provides general expertise in the areas of promotion, prospecting and informing potential investors. It also ensures active monitoring of investors based in Wallonia, as well a mission to find foreign buyers for Walloon industrial sites in the process of restructuring.

AWEX is also competent for the strengthening of the Wallonia brand image overseas.

AWEX has a workforce of more than 400 people and about one hundred offices overseas.

Coris BioConcept is a middle-sized company (SME) specialized in developing, manufacturing and marketing rapid diagnostic tests. Since more than twenty years, Coris BioConcept has developed a broad range of antigen detection tests for enteric, gastric and respiratory diseases.

These tests are based on the immunochromatography technology with colloidal gold particles or latex microspheres. A new range of ICT products has been recently developed for detecting Carbapenemase-Producing Enterobacteriaceae (CPE).

Coris BioConcept has also developed a new multiplex molecular Platform based on the microfluidic technology for multiplex diagnosis and provides services for custom tests development & contract manufacturing.

Coris BioConcept is present in 70 countries in Europe, Asia, South America, Africa and Oceania and is also engaged in a Total Quality Assurance program ISO 13485 with all rapid test products CE marked.

DiAgam is a European company, with more than 20 years of experience, which manufactures Specific Protein reagents:

- Label CE
 - ISO 9001 and ISO 13485.
 - Liquid reagents, controls and calibrators
 - Calibrators and controls are traceable to International Standards (WHO, IFCC, NIBSC, etc...)
 - Nanotechnologies with colloidal particles for CRP, Cystatin C, Ferritin & RF
- Thanks to our manufacturing flexibility, all our parameters in different packaging:
- Kits dedicated to analysers (Modular®, cobas c, AU®, Ortho VITROS®, Abbott Architect®- Siemens ADVIA®)*
 - Vials and Bulk, available with our label or in OEM.

Diagnostic Kits

For more than 15 years, Diagenode Diagnostics designs, manufactures and commercializes innovative and trusted Real-Time PCR CE-IVD kits for the detection of pathogens (bacteria, parasites and viruses) associated with many infectious diseases. Based on these combined expertises, Diagenode Diagnostics has developed sustainable partnerships with clinical microbiology laboratories and IVD companies around the world. Current focus: Mycoplasma genitalium with a dedicated Real-Time PCR CE-IVD kit to identify macrolide-resistant strains.

MDx Assay Development Service

ISO 13485 certified, Diagenode Diagnostics also develops and manufactures custom molecular diagnostics assays according to the specific requirements provided by number of leading IVD companies (product design, lyophilization, instrument compatibility, packaging, quality, regulatory, CE / FDA, product documentation...).

DIAsource ImmunoAssays SA develops, manufactures and markets clinical diagnostic products in the fields of endocrinology, infectious diseases and autoimmunity.

DIAsource put his expertise in the development of new antibodies and assays to measure relevant biomarkers. We are strengthening our position in the diagnostic market by validating our ELISA assays on our open automate.

We are committed to Vitamin D, including IVD and RUO Products. Our panel of assays allows the performant detection and measurement of various forms of Vitamin D metabolites : 25OH Vitamin D, 1,25(OH)₂ Vitamin D.

We also provide selected instrumentation as the Neptune instrument, allowing the automation and interpretation of a wide range of Autoimmunity dotblots. Along with this instrument, DIAsource reader, washer, shaker and open fully automated Elisa platforms will provide the complete portfolio helping our customers to automate their tests.

ONCODNA

www.oncodna.com

In attendance at AACC :

OncoDNA helps oncologists select better treatments for patients. It combines advanced, comprehensive testing of disease biomarkers with a cancer treatment knowledge database which continuously 'learns' from scientific and medical advances. Four analyses are available: OncoDEEP®, OncoSTRAT&GO®, OncoTRACE™ and OncoSELECT®. Results report and follow-up data are accessible on the OncoSHARE® platform. For institutions performing their own analyses, OncoDNA has an innovative analysis platform, OncoKDM®, which integrates all test results from one sample into a customised report.

In order to overtake the limitations of mouse model with difficult immunogens, SynAbs is offering unique multi-species immunization approach (proprietary rat and guinea pig myeloma cell lines), combined with particular immunization schemes to generate:

- custom monoclonal antibodies against poor immunogenic antigens thanks to singular antigenic repertoire access, delivering outstanding affinity and specificity mAbs against hormones, toxins, peptides, post-translational modifications, polysaccharides...
- an integrated service offer from the antigen synthesis, the generation of stable clones, the manufacturing of several grams of mAbs also with the development and validation of custom immuno-assays for IVD and Biopharma players,
- an extensive catalog of off-the-shelf primary and secondary monoclonal antibodies, for your R&D applications.

VOLITION

**Rue Phocas Lejeune 22
5032 ISNES
BELGIUM
Phone : + 32 81 40 79 10**

www.volitionrx.com

In attendance at AACC :

**Mark Eccleston, Business Development Director
m.eccleston@volitionrx.com**

Volition is a cancer diagnostics company with a proprietary epigenetic profiling technology - Nucleosomics®. Our focus is early stage cancer diagnosis and prognosis. We are utilising nucleosome structure (histone modifications, variants, DNA modifications and nucleosome-protein adducts) in serum profiled by our Nu.QTM ELISAs, as predictors of indication and stage.

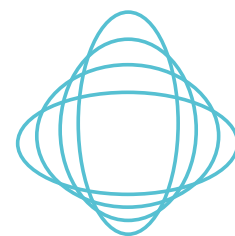

We have pivotal trials underway in Europe including a training and validation study with a combined 14 000 asymptomatic subjects for Colorectal Cancer (CRC) Screening. Training will be completed in Q3 with validation in Q4 2018 followed by CE marking of our lead CRC screening blood test.

In parallel Volition is cosponsoring an NCI collection of a 13500 subject screening cohort for US CRC clinical trials. Collection of a 5000 CRC screening cohort in Taiwan is also due to commence in 2018.

Development activities are centered in Belgium augmented by commercialization work in Singapore with a focus on bringing its revolutionary diagnostic products to market first in Europe, then the U.S. and worldwide.

ZENTECH

ZenTech

**Liège Science Park
Avenue du Pré-Aily, 10
4031 Angleur

Wallonia.be

Wallonia is full of great assets. Help spread the word !

You like Wallonia and you want to enhance its global reputation ? Join our network of Wallonia.be Brand Ambassadors !

One mission, lots of benefits!

We want to promote Wallonia and you can help us: share information from our website and social networks, add the Wallonia.be logo and slogan Feel inspired to your website, blog or email signature, inform us about development opportunities for the Wallonia Region, bring the brand to life by actively taking part in conversations on Facebook, Twitter or LinkedIn and by recruiting other Ambassadors...

In return, you get a chance to:

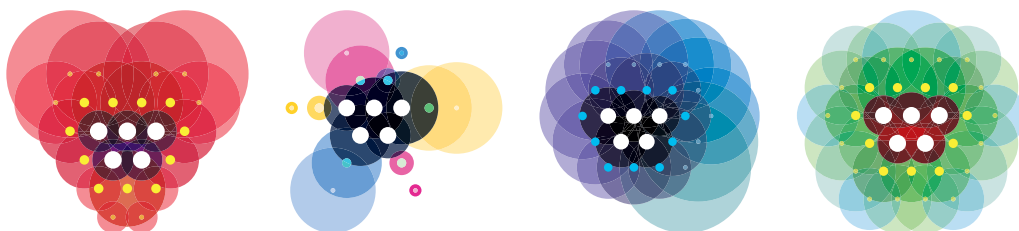

- promote your activities and share your success stories on the Wallonia.be Ambassadors' blog
- expand your network using the private area on the portal
- receive a newsletter about the Region and the Brand Ambassadors' network
- be invited to exclusive events
- use the Wallonia brand logo and benefit from the Region's reputation

How to become a Brand Ambassador?

Complete the online application form on the website (<http://www.wallonia.be/en/ambassadors>). Simply answer three questions and we will let you know if your profile matches the network we want to implement.

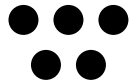

Do you want more information?

Contact : ambassador@wallonia.be !

Wallonia is open to the world !

... with a sense of sharing, accessibility, technical know-how and quality of life
