EXPORT
INVESTMENT

The Wallonia Export-Investment Agency (AWEX) is the institution in charge of the development and management of Wallonia's domestic and international economic relations.

Through a personalized, innovative, and sustainable approach, AWEX supports Walloon companies - regardless of their size, sector, or target market - in every step of their international endeavors. This includes exports, technological partnerships, and development abroad.

The agency's vast network of connections ensures the best advisors are always by your side. Our local anchors and agents abroad are capable of providing unparalleled insight to take your company to the next level. In addition, our connections will help establish your business in the global marketplace and promote it throughout the world. Training, incentives, and international financing are also available.

AWEX is also committed to strengthening Wallonia's position as the premier gateway for international investors seeking success in the heart of Europe. We work closely with them to inform, convince, and advise in every stage of their development.

Feel free to get in touch with one of our local or international agents via our websites listed above. In our network of more than 400 employees in nearly 100 countries around the world, there is always someone ready and willing to support you in your approach.

The ICT platform for Wallonia

Located at the heart of the ecosystem of initiatives and ICT stakeholders in Wallonia, Digital Wallonia is their place of convergence, expression and support.

Digital Wallonia is a true Hub, offering layers of customizable services activated on demand, in an open and participative model:

- **Dynamic mapping of the ICT ecosystem.** . ICT profiles (companies, actors, innovative users), products and services, technology clusters, digital communities, ...
- **Vision & digital uses.** Plan for the digital by the Walloon Government. Technological, legal and economic watch, content and white books, barometer and ICT indicators, ...
- **Services and Support.** Online (data, API, calendar, ...) and physical, for the partners and all the stakeholders of the ICT ecosystem (schools, public services, companies, ...), according to the needs
- **Open Data.** Hub for the Walloon Open Data, services for the public actors for the management and open data, ...

Digital Wallonia is powered by the Agence du Numérique (AdN).

ALX Systems present at the CES 2020 his brand new UAV, the Vanguard. This ruggedized UAV sustain GPS denied environment, high interferences environment, harsh conditions, electric shocks and bad weather while providing the best stability.

Thanks to his secure processing bay, the Vanguard can embed up to 4 I7 processors and more than 3.000 CUDA cores. Fully scalable the Vanguard can fly up to 75 minutes giving the best of the flying technology.

Based on ALX Operating System, the Vanguard will enable smart features like obstacle avoidance and path finding, smart and accurate landing, onboard AI for failure detection, environment analysis and image processing.

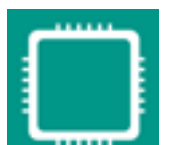

You will control it all over the world with our multi-user ground station through our secure link, radio or LTE based.

Application based, the ALX Operating system will enable the operator to change the business context of the UAV, to optimize for security, law enforcement, protection against UAV or inspection.

Through the ALX Development Studio, you'll be able to create your own application to install on the UAV.

Thanks to the simulation environment, you'll be able to test all your scenarios and provide detail reports to authorities to get flight exemption.

The Vanguard is the ultimate UAV to succeed in any mission in any environment.

Revolutionary modular software that meets all organizational needs of virtual fairs, jobfairs, physical fairs & corporate events.

A white label tool ready-to-use, very powerful and experienced. Customized solution, affordable rates, worldscale product. All languages accepted.

This comprehensive offering is unique on the market: we offer many modules in addition to virtual stands: job, product catalog, community, events, news, publication, calendar, detailed statistics, etc. All languages accepted.

Virtual fairs : Offer forward-looking services to your exhibitors throughout the year.

Physical fairs : Integrate our software to prepare, announce and extend your physical event.

Job fairs : Expert solution for organizing online recruitment fairs.

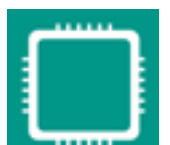

Education forums : High schools/Universities, private forums for students in complement to physical job days

Corporate Platforms : The same platform can be aimed at professionals, consumers or used as an in-house tool.

Looking for scale-up : distributors and/or investor.

intoPIX is an innovative technology provider of low power, low complexity image processing and video compression IP-cores. The technologies that we license are enabling the simplified connectivity, reduced latency, reduced power and an increased quality in many devices and applications. At CES, we are showing how the new image Sensors and cameras, automotive ADAS systems, mobile devices, 8K displays, 5G/ wireless video applications get benefit from our technologies.

The following technologies will be highlighted at the show:

- JPEG-XS technology: the first IP-core & software implementations of the new ISO JPEG XS compression algorithm (for ASIC, FPGA and software). JPEG XS is the new standard for microsecond-latency lightweight video compression, known as intoPIX TICO-XS®. (www.intopix.com/jpegxs).
- TICO-RAW technology: the new low memory and low complexity raw image processing and compression designed to reduce bandwidth and preserve raw image sensor data information.
- FlinQ technology: a new technology especially designed for 5G and other wireless applications, cloud-based gaming where we cannot compromise on latency and image quality.

intoPIX will show new efficient ways to transmit, store or manage higher resolutions (HD, 4K, 8K) with - all combined - a reduced power consumption, a reduced complexity, a reduced memory, a reduced video bandwidth and a zero latency preserving lossless quality (from 4:1 down to 20:1 compression) and preserving high dynamic range (HDR) for both visualization and analytics. intoPIX IP-cores are licensed under several platforms including ASIC, FPGA, GPU or CPU.

Visit the intoPIX booth (booth #35829 - South Hall 4) to see live demonstrations of the intoPIX technologies. To learn more about intoPIX or arrange a private demonstration during CES, contact intoPIX.

www.phasya.com

In attendance at CES:

Jérôme WERTZ
CEO
j.wertz@phasya.com

Clémentine FRANÇOIS
Chief Scientific Officer
c.francois@phasya.com

Phasya offers software for monitoring physiological and cognitive states (e.g. drowsiness, stress, cognitive load, etc.) that impact human performances, well-being, and user experience. Our software portfolio is based on the analysis of data produced by the human body, i.e. physiological data (e.g. eye movements, heart rate, etc.). Furthermore, this software is adaptive to a range of data specifications in order to fit various sensing platforms.

Phasya aims to revolutionize the way people interact with equipment and content by offering innovative solutions that enable a better understanding of factors that influence human performances and errors. Our main business is to improve safety in transportation and industry, in particular with several references among automotive OEMs and Tiers 1.

Phasya is an alumni of Plug and Play and received several international awards such as the “CLEPA Innovation Award” in 2019 and the “Innovator Under 35” by the MIT Technology Review in 2015.

The number of IoT devices is increasing with the speed of light. It is estimated that by 2025, there will be more than 30 billion connected objects in the world. What does it mean for the whole industry?

- consumers [be them end users or industries] crave for devices that will not give them a headache of battery re-charge or replacement
- the manufacturers want less bulky innovative devices which consumers will love
- the planet is asking for greener solutions.

With this in mind, e-peas develops best performing Power Management Integrated Circuits [PMICs] and Microcontrollers that help companies make their IoT devices smarter and more energy efficient by either prolonging battery life or making the devices live forever with or without battery. In other words, our new technology makes your devices more efficient, more desirable by consumers and greener which contributes to a healthier planet for generations to come.

As a winner of multiple awards, we want to give you the best competitive advantage. We can beat the conventional battery technology together by developing innovative next generation IoT products everyone craves for.

HAN COMMUNICATION

Rue du Moulin, 18
5650 Fraire
BELGIUM

Phone: + 32 71 610 640

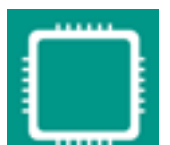

In attendance at CES:

Philippe Bolle
CEO
philippe.bolle@han-communication.com

With both the emergence of the Internet of Things and faster WiFi technology, the ISP are facing a complementary request from their subscribers: Resilience and Quality of the Local Area Network behind the Internet Gateway.

To fulfill this challenge, Skylane Optics R&D acted in the international scene to develop IEEE802.3bv, the Ethernet Standard for Gigabit over Plastic Optical Fiber, and ITU-T G.hn, the second life technology for home copper wires to reach nowadays Gigabits speeds up to the consumer devices across their entire house.

HAN Communications a spinoff, has taken over the R&D to leverage such new data transmission machinery to create an innovative product (the Wired Multi-Radio WallPlug) suite which is both easy to deploy (DIY), eco-friendly, wires agnostic, network sustainable and not visually unsightly.

INVINEO

INVINEO
INTEGRATED WINE BY THE GLASS SOLUTION

BELGIUM

Phone: + 32 499 60 34 01

www.iopool.com

In attendance at CES:

Sebastien Beaumont, Customer service and logistics
sebastien@iopool.com

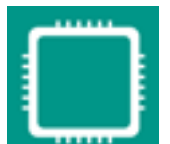

Romain Trigaux, Chief Operating Officer
romain@iopool.com

IOPOOL is a technology-driven pool predictive maintenance company. We offer a collection of pool and spa related innovative maintenance solutions for pools of any size.

We have developed an all-in-one solution which consists of:

- A small and compact, energy-efficient floating connected probe analysing water quality 24h/7,
- An AI-driven mobile app that gives the user a bird's eye view on the pool water quality, and provides advice and guidance for its continuous treatment/management,
- Treatment products. Selection of the best active chemicals adapted to the water state and delivered at home for easy and efficient use (reduce chemicals use by 4-5 and water use by 2-3 times)

The floating probe - applicable to private and residential pools - collects in real-time key data regarding the pool health. These data are retrieved via the user's mobile app, and then relayed in the cloud with a set of rules and our specific AI algorithm that automatically calculates and predicts the quantity of products needed for an optimum pool maintenance.

Jerome Laurent-Michel, Clinical Advisor, co-founder jl@mintt.care

Franck Casado, CTO, co-founder fc@mintt.care

ISA, the assistant in case of falls by MintT.

As a specialist in the behavioural analysis of elderly people, we, at MintT, have developed a technological approach to helping people age well and improving the quality of care.

Based on a 3D sensor, ISA allows a fine analysis of patient behavior through motion tracking algorithms, while protecting the privacy of individuals.

Autonomous and non-intrusive, ISA has the embedded intelligence needed to detect all types of falls and adapt to the configuration of the room. ISA was designed to lighten the work of carers while improving the quality of care services.

ISA is a technology that can be easily deployed in hospitals and nursing homes.

« In Wallonia, we have found skillful human resources and an ideal location »

Wallonia.be

Wallonia is full of great assets. Help spread the word !

You like Wallonia and you want to enhance its global reputation ? Join our network of Wallonia.be Brand Ambassadors !

One mission, lots of benefits!

We want to promote Wallonia and you can help us: share information from our website and social networks, add the Wallonia.be logo and slogan Feel inspired to your website, blog or email signature, inform us about development opportunities for the Wallonia Region, bring the brand to life by actively taking part in conversations on Facebook, Twitter or LinkedIn and by recruiting other Ambassadors...

In return, you get a chance to:

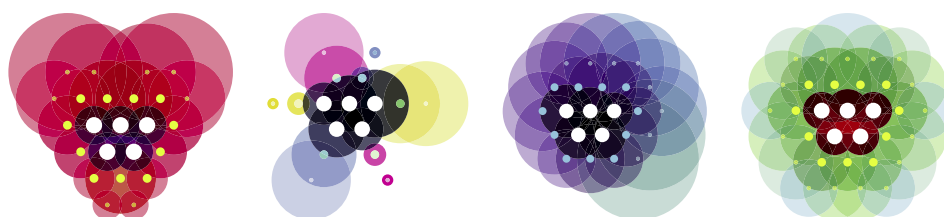

- promote your activities and share your success stories on the Wallonia.be Ambassadors' blog
- expand your network using the private area on the portal
- receive a newsletter about the Region and the Brand Ambassadors' network
- be invited to exclusive events
- use the Wallonia brand logo and benefit from the Region's reputation

How to become a Brand Ambassador?

Complete the online application form on the website (<http://www.wallonia.be/en/ambassadors>). Simply answer three questions and we will let you know if your profile matches the network we want to implement.

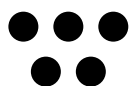

Do you want more information?

Contact : ambassador@wallonia.be !

Wallonia is open to the world !

... with a sense of sharing, accessibility, technical know-how and quality of life
